

Kinetic Connections

Finding order in chaos is a problem familiar to us all. This event provides you with the solution.

Kinetic Connections is an abstract scenario event which mirrors real life business challenges. With little information and no initial direction, only the combined effort of every individual member of the group makes the impossible possible, achieving success on schedule.

How it Works

Assemble this giant kinetic model by interpreting clues, completing challenges, solving cryptic clues, and working to Haynes style diagrams. Collaborate and negotiate with other teams for components, resources, and expertise. The co-operation and hard work result in a fantastic finale where the models come to life finishing your event on a high!

The End Results

- 6 Develops cross-team communication and collaboration
- 6 Breaks down barriers at work - brings teams together to achieve a shared goal
- 6 Plays to strengths of all participants
- 6 Raises awareness of how behaviour can impact on performance

What's Included

- ✓ Giant, colourful puzzle pieces

17:00 Event ends

Down to Detail

Group: 20 - 120
Time: 2 - 3 hours
Place: UK / Worldwide
Venue: Indoor
How Green? High
How Inclusive? High

Our main goal was "working together" and the Kinetic Connections activity worked extremely well for this.
